## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 1 and 8-17 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Objections***

2. Claims 14 and 15 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 14 and 15 state that the outer layer and end pieces have a hardness on the Shore A scale, however, the claim from which they depend include these limitations.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 has been amended to be a closed ended claim by the use of "consisting of." The

specification is drawn to an apparatus inclusive of two end pieces and as such, the specification does not provide for a chewing apparatus which consists of only a single end piece as it provides a basis for inclusion of a first and second end piece.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 8, 9, 15 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
7. Claims 8-17 recite the limitation "said first and second end pieces" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim. Claim 1 recites a singular end piece and does not provide for a second end piece.
8. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 17 recites the broad recitation the

body portion is made of an elastomer material, and the claim also recites in claim 1 that the material ins from the group consisting of natural rubber, polyurethane rubber or thermoplastic elastomer which is the narrower statement of the range/limitation.

9. Claims 8-17 are indefinite for failing to point out and distinctly claim the subject matter that applicant regards as their invention. The independent claim includes the closed ended recitation of "consisting of." M.P.E.P. 2111.03 states "A claim which depends from a claim which "consist of" the recited elements or steps cannot add an element or step." M.P.E.P. 2111.03 As such, claims 8-17 introduce additional elements not encompassed by the closed ended independent claim.

### *Conclusion*

10. It is noted that if the applicant were to file an amendment providing a claim inclusive of the transitional phrase "consisting of" and including the first and second end pieces and deleting all dependent claims introducing additional elements, the claims would receive favorable consideration.

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
